Docket No.: DC-03060 (16356.648)

Claims

What is claimed is:

7	1	A chaakar annaratue	comprising.
Ţ		A speaker apparatus	comprising.

- a speaker; and
- an acoustic box connected to the speaker, the box having a sound reflecting distal wall including a plurality of stepped portions of variable distances from the speaker.
- The apparatus as defined in claim 1 wherein the speaker is in a snap-fit engagement with the acoustic box.
- The apparatus as defined in claim 1 wherein the acoustic box includes a plurality of chassis mounting tabs.
- The apparatus as defined in claim 3 wherein the acoustic box includes a chassis mounting clip with a bendable tab.
- The apparatus as defined in claim 1 wherein the acoustic box includes a speaker wire exit opening formed therein.
- 1 6. The apparatus as defined in claim 1 wherein the acoustic box includes a plurality of speaker mounting ledges.
- The apparatus as defined in claim 1 wherein the acoustic box includes a plurality of speaker retention tabs.
- 1 8. The apparatus as defined in claim 1 wherein each stepped portion is a different distance from the speaker than each other stepped portion.

1 9. A computer chassis comprising:

- 2 a chassis wall;
- a speaker mounted on the chassis wall; and
- an acoustic box connected to the speaker, the box having a sound reflecting distal wall including a plurality of stepped portions, each stepped portion being of a different distance from the speaker than each other stepped portion.
- 1 10. The chassis as defined in claim 9 wherein the speaker is in a snap-fit engagement with the acoustic box.
- 1 11. The chassis as defined in claim 10 wherein the acoustic box includes a plurality of chassis mounting tabs.
- 1 12. The chassis as defined in claim 11 wherein the acoustic box includes a chassis mounting clip with a bendable tab.
- 1 13. The chassis as defined in claim 12 wherein the acoustic box includes a speaker wire exit opening formed therein.
- 1 14. The chassis as defined in claim 13 wherein the acoustic box includes a plurality of speaker mounting ledges.
- 1 15. The chassis as defined in claim 14 wherein the acoustic box includes a plurality of speaker retention tabs.
- 1 16. The chassis as defined in claim 9 wherein each stepped portion is a different distance from the speaker than each other stepped portion.

Docket No.: DC-03060 (16356.648)

1	17.	A computer system comprising:
2		a chassis;
3		a microprocessor mounted in the chassis;
4		an input coupled to provide input to the microprocessor;
5		a storage coupled to the microprocessor;
6		a video controller coupled to the microprocessor;
7		a memory coupled to provide storage to facilitate execution of
8		computer programs by the microprocessor;
9		a speaker mounted on the chassis; and
10		an acoustic box connected to the speaker, the box having a sound
11		reflecting distal wall including a plurality of stepped portions of variable
12		distances from the speaker.
1	18.	The system as defined in claim 17 wherein the speaker is in a snap-fit
2		engagement with the acoustic box.
1	19.	The system as defined in claim 17 wherein the acoustic box includes a
2	10.	plurality of chassis mounting tabs.
4		plurality of chassis mounting tabs.
1	20.	The system as defined in claim 19 wherein the acoustic box includes a
2		chassis mounting clip with a bendable tab.
1	21.	The system as defined in claim 18 wherein the acoustic box includes a
2		speaker wire exit opening formed therein.
1	22.	The system as defined in claim 17 wherein the acoustic box includes a
2		plurality of speaker mounting ledges.
1	23.	The system as defined in claim 22 wherein the acoustic box includes a
2		plurality of speaker retention tabs.
1	24.	The system as defined in claim 18 wherein each stepped portion is a different
2		distance from the speaker than each other stepped portion.
